Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner called Mr. Litman to inform him that the amendment to the specification directed to "related applications data" (continuing data) filed 3/7/2005 was improper since it attempted to claim a later filed application, for example, 09/322,042 as a continuation-in-part, and a later filed application cannot be any type of continuing case. It was agreed upon to cancel the "related application data" of 3/7/2005 and use the continuing data of the amendment filed 11/9/1998 which is correct.
